This action is responsive to the communication filed January 29, 2003.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-18 and 21-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Linkner, Jr. in view of Honobe et al.

Linkner shows a mounting apparatus for a brake control unit including three mounting points. The center of the bracket 12 is read as the support structure with three L shaped members integrally connected thereto. Linkner does not disclose a reservoir. Honobe et al teach a mounted brake control unit which includes a reservoir. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have used the Linkner apparatus to mount a unit such as that of Honobe et al, which can reasonably be described as mounting a reservoir.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
